A HERITAGE OF PERFORM ANCE

SPX performance strakes are mounted on the inside of the outer tubes and on both sides of the middle tube to deliver the tighter turning radius and faster planing that are vital for all water sports and cruising.

SPX TRIPLE-TUBE

Our SPX triple-tube performance package with specially designed performance strakes sets the standard for pontoon performance. By delivering better lift, less surface drag, greater speed, a tighter turning radius and faster planing—all without sacrificing the smooth, stable ride that Sylvan is known for—SPX performance lets you turn quickly to pick up a downed skier or glide above the chop on a windy day.

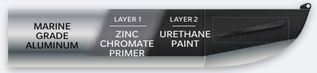

The SPX PR25 triple-tube performance package is built to make the most of today's higher horsepower engines. SPX performance strakes are mounted on the inside of the outer tubes and on both sides of the center tube to deliver a tighter turning radius and faster planing for water sports and cruising.

The innovative center tube design allows you to add more horsepower at any length for optimal performance. An integrated ski pylon, performance shield, hydraulic steering and a built-in fuel tank in the center tube come standard.

PAINTED TUBE OPTION

Sylvan Marine pontoon tubes are constructed with up to .100"-gauge marine-grade aluminum. And now, with the painted tube option, you get the added durability provided by a combination of zinc chromate primer and urethane paint, which forms a corrosion-resistant surface.

A HERITAGE OF INNOVATION

For over 75 years, Sylvan has led the pontoon boat industry with cutting-edge technology and countless innovations that have been widely adopted by other manufacturers.

THE STRONGEST FOUNDATION ON THE WATER

Sylvan pontoons offer incredible performance today and durability that will last for years to come. It all starts with a solid foundation built on stronger designs, better materials and the benefit of over 75 years of experience crafting the best pontoon boats on the water. Rest easy knowing that when you buy a Sylvan, you're buying the best.

SEE OUR ROBOTS IN ACTION

A CONSTRUCTED FOR ENDURANCE
¾", 7-ply pressure treated plywood is through-bolted and screwed to the hat channels to create the strongest seams in the industry.

B HAT-CHANNEL CONSTRUCTION
How does Sylvan build the widest base in the industry without adding extra weight? We use strength points of "heavy" .250"-gauge (shown) and .125"-gauge (standard), 6"-wide aluminum hat channels and secure them by spreading 8 bolts across 6" deck risers. We combine that with a .190"-gauge aluminum transom, through-bolted with up to 20 bolts, and footed deck risers that eliminate tube fatigue. We're so confident that our construction is the best that we back it with a Limited Lifetime Warranty.

C FENCE AND RAILING
We back our fence and railing with foam to prevent rattling, but only after fully welding and anodizing every joint. Once a weld is anodized, it is never painted. Every foot of fence and railing is backed by a 6-year warranty.

D THRU-BOLTED TRANSOM
Sylvan transoms are made from aluminum gauges as heavy as .190" and are supported with up to 20 stainless steel bolts—all to handle today's higher horsepower engines.

E AIR-TIGHT CONSTRUCTION
Our tubes feature air-tight construction with a completely welded-in baffle at each chamber, plus a drain at the bottom. A drain plug at the rear of the tube allows water to be completely removed from the tube if necessary.

F SUPERIOR CONSTRUCTION
Innovative manufacturing with advanced, automated tube-forming cells for superior construction and tube strength.

G 4-POINT DECK-TO-HULL FUSION
Every Sylvan deck bracket is fused to the tube at four points to increase the contact area with the tube. Besides increasing strength and support, four-point fusion reduces frame twist and racking in rough water and helps prevent tube fatigue.

INNOVATIVE FLOORPLANS

Sylvan offers the most unique floorplan options with furniture configurations like loungers, bar sets and flip-back seating, all designed with durability and comfort in mind.

Innovation, quality and performance have been Sylvan hallmarks from the day we started building boats way back in 1948. But just as important is our focus on value. That's why every model in our Mirage Series comes loaded with standard features that other brands charge extra for. No pontoon on the water offers greater value.
